1. Nature of Operations

Royal Road Minerals Limited ("Royal Road", "RRM", the "Company", or the "Corporation") was incorporated under the *Companies (Jersey) Law 1991* on May 6, 2010 as "Tigris Resources Limited". On April 10, 2015, the Company changed its name to "Royal Road Minerals Limited" and amended its share capital structure by converting all of its par value shares to no par value shares and consolidating its then outstanding shares on the basis of two pre-consolidation shares for every one post-consolidation share. On April 15, 2015, the Company completed a business combination transaction (the "Arrangement") by way of an arrangement under the *Business Corporations Act* (Alberta), whereby the Company acquired its wholly-owned subsidiary Royal Road Minerals Canada Limited ("RRMC"), a corporation resulting from the amalgamation of Kirkcaldy Capital Corp. ("Kirkcaldy") and Royal Road Minerals Canada Limited. As a result of the Arrangement, on April 20, 2015, the ordinary shares (the "Ordinary Shares") of the Company were listed and commenced trading on the TSX Venture Exchange (the "TSXV") under the trading symbol "RYR". The Company's registered and head office is located at Ground Floor, 4 Wharf Street, Suite 30, St. Helier, Jersey, Channel Islands, JE2 3NR.

The Company carries on its operations in Colombia through its wholly-owned subsidiaries, Minerales Camino Real, SAS ("RRM Colombia") and Exploraciones Northern Colombia Exploration ("ENC"); in Nicaragua, through its wholly-owned subsidiary, Minerales Camino Real Nicaragua, SAS ("RRM Nicaragua") (formally "Nicaza S.A").

Initially the Company commenced exploration operations in Turkey, focused principally on the country's highly prospective southeast where it worked with predominantly Kurdish communities before and immediately after the Turkish-Kurdish peace process of March 2013. In August of 2015 the Turkish-Kurdish peace process collapsed and hostilities recommenced. The Company then moved its operations to Colombia where it secured exploration joint-ventures with local parties and submitted applications for concession contracts in the highly prospective southern Colombian province of Nariño.

In 2017, Royal Road acquired the interests of Caza Gold in Nicaragua which include the Los Andes porphyry coppergold and the Piedra Iman ironoxide coppergold prospects. Subsequently, the Company executed a 50/50 strategic exploration alliance with Hemco-Mineros Nicaragua, in which both companies combined exploration assets in Nicaragua in order to explore and develop them on a 50/50 basis. This arrangement provides Royal Road access to Hemco-Mineros' exploration assets in the highly prospective Golden Triangle region of northeastern Nicaragua.

In 2019, the Company completed a purchase and sale transaction to acquire the exploration assets of AngloGold-Ashanti in Colombia. The assets include concession contracts and concession applications in the Middle Cauca valley and throughout southern Colombia.

COVID-19

Commencing in March 2020, the outbreak of the novel strain of coronavirus, specifically identified as "COVID19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions.

The duration and impact of COVID-19 pandemic, as well as the effectiveness of government and central bank responses, remains unclear at this time. While the Company for a period of time during the six months ended September 30, 2020, slowed business activities to ensure the safety of staff and consultants, the Company's operation has been able to continue moving forward on its exploration activities despite the significant global disruptions in business operations. The Company anticipates local lockdowns and quarantine guidelines to continue to pose a threat to the operations of the Company through to the end of the 2020 fiscal year.

1. Nature of Operations (continued)

Going concern

These unaudited condensed consolidated interim financial statements have been prepared on the going concern basis, which assumes that the Company will be able to continue as a going concern and realize its assets and discharge its liabilities in the normal course of business. These unaudited condensed consolidated interim financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern. During the nine months ended September 30, 2020, the Company incurred a net loss of \$5,004,142 (nine months ended September 30, 2019 - \$3,625,967). As at September 30, 2020, the Company has incurred significant losses since inception totaling \$25,871,897 (December 31, 2019 - \$20,975,205). As at September 30, 2020, the Company has a working capital of \$10,258,211 (December 31, 2019 - \$3,173,746); the continuing operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management is of the opinion that additional funds will be obtained from external financing to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These factors indicate the existence of a material uncertainty that may cast significant doubt as to the Company's ability to continue as a going concern and accordingly use accounting principles applicable to a going concern.

2. Significant Accounting Policies

(a) Statement of compliance

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by IASB and interpretations issued by IFRIC. The accounting policies and methods of computation applied by the Company in these unaudited condensed interim consolidated financial statements are the same as those applied in the Company's audited annual consolidated financial statements for the year ended December 31, 2019, other than as noted below. The unaudited condensed interim consolidated financial statements were approved by the Board of Directors on November 30, 2020.

(b) Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis and presented in Canadian dollars.

(c) Basis of consolidation

The condensed interim consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company. As at September 30, 2020, the Company has 4 wholly-owned subsidiaries, RRMC incorporated in Canada, Nicaza S.A. incorporated in Nicaragua; MCR and ENC, incorporated in Colombia; and owns 99% of MCR Peru, incorporated in Peru; collectively, ("Group"). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The results of subsidiaries acquired or disposed of during the period are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate. Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group. All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

2. Significant Accounting Policies (Continued)

(d) Critical judgments in applying the Company's accounting policies

In the application of the Company's accounting policies, which are described in Note 2, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The most significant critical judgment that members of management have made in the process of applying the entity's accounting policies are as follows:

Functional currency

Management uses its judgment to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. As part of this approach, management gives priority to indicators like the currency that mainly influences costs and the currency in which those costs will be settled and the currency in which funds from financing activities are generated. The functional currency of the parent is the Canadian dollar. The Company has determined the functional currency of its Colombian, Nicaraguan and Peruvian subsidiaries to be the Colombian peso, Nicaraguan cordoba and Peruvian sol.

Business combinations

Determination of whether a group of assets acquired and liabilities assumed constitute the acquisition of a business or an asset may require the Company to make certain judgments as to whether or not the assets acquired and liabilities assumed include the inputs, processes and outputs necessary to constitute a business as defined in IFRS 3 Business Combinations.

Key sources of estimation uncertainty

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The Black-Scholes Option Pricing Model was developed for use in estimating the fair value of traded options which were fully tradable with no vesting restrictions. This option valuation model requires the input of highly subjective assumptions including the expected stock price volatility, expected life of the instrument, forfeiture rate, and future risk-free rate. Because the Company's stock options and warrants have characteristics significantly different from those of traded options and because changes in the subjective input assumptions can materially affect the calculated fair value, such value is subject to measurement uncertainty.

2. Significant Accounting Policies (Continued)

(e) Change in accounting policies

Definition of a Business (Amendments to IFRS 3)

The IASB has issued Definition of a Business (Amendments to IFRS 3) to clarify the definition of a business for the purpose of determining whether a transaction should be accounted for as an asset acquisition or a business combination. The amendments:

- clarify the minimum attributes that the acquired assets and activities must have to be considered a business
- remove the assessment of whether market participants can acquire the business and replace missing inputs or processes to enable them to continue to produce outputs
- narrow the definition of a business and the definition of outputs
- add an optional concentration test that allows a simplified assessment of whether an acquired set of activities and assets is not a business

This amendment is effective for annual periods beginning on or after January 1, 2020. The Company adopted this policy and there was no impact to the unaudited condensed interim consolidated financial statements.

(f) New standards not yet adopted

Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)

The IASB has published Classification of Liabilities as Current or Non-Current (Amendments to IAS 1) which clarifies the guidance on whether a liability should be classified as either current or non-current. The amendments:

- clarify that the classification of liabilities as current or non-current should only be based on rights that are in place "at the end of the reporting period"
- clarify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability
- make clear that settlement includes transfers to the counterparty of cash, equity instruments, other assets or services that result in extinguishment of the liability.

This amendment is effective for annual periods beginning on or after January 1, 2022. There is currently a proposal in place to extend effective date for annual periods beginning on or after January 1, 2023. Earlier application is permitted. The extent of the impact of adoption of this amendment has not yet been determined.

3. Acquisition of Exploraciones Northern Colombia Exploration

Acquisition

On May 25, 2019, the Company was successful in its bid to acquire a group of companies from AngloGold Ashanti Limited. ("Anglo" or the "Seller"). The acquisition included Northern Colombia Holdings Limited, Northern Colombia Investment One Limited, and Northern Colombia Investment Two Limited; which collectively owned all issued and outstanding shares of the operating company Exploraciones Northern Colombia Exploration ("ENC"), the subject of the transaction.

ENC did not meet the definition of a business and therefore this transaction has been accounted for as an asset acquisition in the consolidated financial statements of the Company.

3. Acquisition of Exploraciones Northern Colombia Exploration (continued)

In addition to the purchase consideration, the Company also is party to contingent consideration which include:

If at any time after the completion of the acquisition, the Company completes a Technical Report pursuant to NI43-101 that discloses for the first time an "inferred mineral resource" (as defined in NI43-101) of not less than one million gold equivalent ounces on a specific area within the lands subject to any of the owned titles held by the Company or any of its subsidiaries ("Specific Project"), and the following provisions shall apply:

1. Specific Project Payment

With respect to each Specific Project, the Company shall pay the Seller, the following amounts, as applicable:

- an amount equal to \$5 million, payable within 90 days following the date on which such Technical Report for the Specific Project is completed and delivered to the Company, such delivery required within fifteen days of completion of the report; and
- ii. a further amount equal to \$5 million, payable within 90 days following the date on which a Feasibility Study for such Specific Project is completed and delivered to the Company, such delivery required within fifteen days of completion of the report; and
- iii. a further amount equal to \$5 million, payable within 90 days from the commencement of commercial production for the Specific Project; and
- iv. a further aggregate amount equal to \$20 million, payable in four equal installments of \$5 million on the date that is 90 days following the end of each of the Company's four consecutive fiscal quarters immediately following the commencement of commercial production for the Specific Project.

2. Feasibility Option

If at any time after the completion of the acquisition, the Company completes a Feasibility Study pursuant to NI43-101 that discloses for the first time an "inferred mineral resource" (as defined in NI43-101) of not less than five million gold equivalent ounces on a Specific Project, the Seller shall have a one-time option (the "Feasibility Option"), exercisable on or prior to the date that is thirty days after the Feasibility Option Date (the "Feasibility Option Expiry Date"), exercised by giving written notice to the Seller of such exercise, and if no such election is given prior to the Feasibility Option Expiry Date, the Feasibility Option shall be null and void and of no further force or effect.

3. If Seller exercises the Feasibility Option for a Specific Project then the Company shall no longer be required to pay and the Seller shall have no right to receive the payments for the Specific Project on which the Seller has exercised the Feasibility Option and the Buyer shall still be required to pay the Seller each of the payments for other Specific Projects in which the Seller has not exercised the Feasibility Option.

The Seller shall have the right to purchase a 75% interest (the "Purchased Interest") in the Specific Project in accordance with procedures agreed between the parties, for a purchase price payable by the Seller to the Company within ten Business Days of the Feasibility Option Expiry Date, by wire transfer of immediately available U.S. dollars to an account designated by the Buyer, and in an amount equal to the sum of the following amounts:

- i. An amount equal to three times the aggregate sum of all Exploration Expenditures up to and including the Feasibility Option Date funded by the Company and any the Company's Affiliates for that Specific Project; plus
- ii. An amount equal to the aggregate sum of all Exploration Expenditures funded by the Company and any the Company's Affiliates for that Specific Project from the Feasibility Option Date until the completion of the transfer of the Purchased Interest, including, but not limited to all costs incurred in preparing the Feasibility Study for that Specific Project.

Given the current status of the project, management believes that there is no nominal value to be assigned to the contingent consideration as of and for the year ended December 31, 2019.

7. Share Capital

(a) Authorized share capital

The authorized share capital consists of an unlimited number of Ordinary Shares without par value. Each Ordinary Share entitles the holder to one vote. All Ordinary Shares of the Company rank equally as to dividends, voting powers and participation in assets upon a dissolution or winding up of the Company.

(b) Common shares issued

At September 30, 2020, the issued share capital amounted to \$41,250,292. The change in issued share capital for the periods presented were as follows:

(i) On May 24, 2019, the Company closed a private placement, pursuant to which an aggregate of 40,000,000 ordinary shares in the capital of the Company were issued at a price of \$0.20 per ordinary share for aggregate gross proceeds of \$8,000,000.

As part of the offering, the Company issued 26,133,158 ordinary shares to Agnico Eagle Mines Limited ("Agnico"). The ordinary shares purchased by Agnico, together with the 16,379,550 ordinary shares owned by Agnico prior to the completion of the offering, represented approximately 19.9% of the issued and outstanding ordinary shares of the Company on completion of the offering.

In connection with the offering, the Company paid a total in cash for commission and fees of \$631,391 and 2,400,000 broker warrants in connection with the offering. Each broker warrant entitles the holder to acquire one ordinary share at a price of \$0.20 until May 23, 2021.

The fair value of these broker warrants of \$224,028 was estimated using the Black Scholes valuation model with the following weighted average assumptions: a 2 year expected term; a 99% expected volatility based on historical trends; risk free interest rate of 1.52%; and an expected dividend yield of 0%.

Colombia

Royal Road Minerals is now one of the largest concession contract and title application holders in Colombia.

The Company is currently conducting regional exploration in southern Colombia and formalizing informal mine operations within its mining titles there. Currently Royal Road has entered into four mining formalization agreements in Nariño. The Agreements were negotiated and entered into under the framework of the Colombian government's National Policy for Mining Formalization wherein specific portions of the area held under concession by the Company will be returned directly to informal miners so that new formalized concession contracts over such returned areas may be granted, enabling legal and responsible mining operations to take place. In exchange, Royal Road will receive a quarterly royalty equivalent to 3% of the doré extracted from the formalized concessions and has been granted the sole and exclusive right to carry out all exploration activities on the formalized concessions and the right to acquire 70% of the formalized concessions, subject to the completion of certain exploration milestones. In-case the Company assists in further optimizing mine operations on formalized concessions, Royal Road may increase the royalty to be received by a further 1%.

Mineros S.A. Transaction

During the nine months ended September 30, 2020, the Company entered into a definitive strategic alliance agreement (the "Agreement") with Mineros S.A. ("Mineros") in relation to the Company's Guintar and Niverengo concessions and its Margaritas title application ("GNM Project") in Antioquia District, Colombia. The Agreement supersedes the previously announced letter of intent entered into by the Company and Mineros. Mineros is a Colombian public company engaged in the business of gold mining and listed on the Bogotá Stock Exchange. Royal Road currently operates in Nicaragua under a separate exploration strategic alliance formed in September 2017 with Mineros' subsidiary, Hemco Nicaragua S.A.

The Agreement contains the following basic terms:

- Mineros agree to pay to Royal Road the sum of USD \$1 million on execution of the Agreement The parties agree that, upon making such payment, they will operate the GNP Project on a joint venture basis with Royal Road as operator
- Mineros has the option (the "First Option") to acquire a 25% interest in the GNM Project by providing Royal Road with USD \$1 million for the exploration of the GNM Project
- If Mineros exercises the First Option, Mineros has the option (the "Second Option") to acquire an additional 25% interest in the GNM Project by providing Royal Road with a total of USD \$1.5 million in additional funding for the GNP Project and thereafter, Royal Road and Mineros would each hold a 50% interest in the GNP Project Company
- Mineros and Royal Road will agree to an initial exploration program and budget for the exploration of the GNM
 Project and; prior to any exercise of the Second Option, the parties will agree to a second program and budget for
 the further exploration of the GNM Project
- At any time after Mineros has acquired a 25% interest and if at such time Mineros elect not to exercise the Second Option, Mineros may elect to cause all titles and the rights to title applications with respect to a designated project area to be transferred to a newly formed special purpose company (the "Project Company"), initially to be owned as to 75% by Royal Road and as to 25% by Mineros
- If Mineros elect to exercise the Second Option and after Mineros has acquired a 50% interest, the titles and the
 rights to title applications with respect to a designated project area will be transferred to a Project Company to be
 owned as to 50% by Royal Road and as to 50% by Mineros. Thenceforth the parties would jointly-fund the
 operations of the GNP
- Project in accordance with the parties' respective interests, which would be subject to dilution under a standard formula The Board of the Project Company will be comprised of directors who represent the parties and the number of such directors will reflect proportionately each party's interest from time to time, provided that if a party's interest reduces to less than 25%, it will not be entitled to any representation on the Board
- If a party's interest is diluted to below 15%, such interest will convert to a 1.5% net smelter royalty Royal Road will be operator of the exploration of the GNM Project for so long as it maintains not less than a 50% ownership interest in the GNM Project

Nicaragua

In early 2017 Royal Road Minerals acquired the Nicaraguan subsidiary of Caza Gold Inc. The acquisition included two key assets, the Los Andes porphyry project and the Piedra Iman (Iron-Oxide) copper-gold project.

In September of 2017 Royal Road executed a 50%-50% Strategic Alliance for gold and copper exploration in Nicaragua with Hemco-Mineros Nicaragua a subsidiary of Colombian company Mineros S.A. The objective of the Alliance is to identify and explore gold and copper targets in Nicaragua in the areas covered by Royal Road's and Hemco's respective existing licenses.

Royal Road and Hemco share their collective experience and databases, co-fund early stage exploration programs, and jointly seek to advance their current projects and pursue new projects in Nicaragua. In particular, the Alliance is initially focused on defining reserves in excess of two million ounces of gold (or gold equivalent) recoverable. Royal Road Minerals is operator of the Strategic Alliance.

11. Related Party Balances and Transactions

In accordance with IAS 24, key management personnel are persons responsible for planning, directing, and controlling the activities of an entity, and include executive and non-executive directors. The key management personnel of the Company are the directors and officers of the Company.

13. Investment in associate

In October 2018, the Company made a \$100,000 equity investment for an 18% interest in Cloris Limited; a non-listed company exploring the industrial hemp and industrial hemp products in the Nariño province of southern Colombia, an area with rich underutilised agricultural resources ideal for the large-scale cultivation of industrial hemp. Cloris Limited has a unique post-conflict co-operative model with Ecomún ensuring local cross-community involvement with 1000 local farmers.

The Company has significant influence over Cloris, and, as such, the Company uses the equity accounting method to record this investment.
